DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed January 6, 2009 are acknowledged.
2. Examiner acknowledges amended claim 1.
3. The rejection of claims 1-2, 5 and 9-10 under 35 U.S.C. 112, second paragraph is overcome by applicant's amendment.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 is rendered indefinite because it is unclear if chemical formula S-1 is the first compound on page 7 of the claims or the 7th compound on page 15 of the claims. There are two(2) different compounds listed in claim 10 labeled as chemical formula S-1.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-2 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ikeda et al., U.S. Patent Number 7,429,425.

Ikeda discloses a blue organic electroluminescent device comprising an anode and a cathode with an organic thin film disposed therebetween. Ikeda discloses that the organic thin film layer includes a luminescent layer having a mixture of materials with the materials being an oligoarylene with the structure

which corresponds to compound H-22 of

present claim 5 and a diaminopyrene with the structure

Art Unit: 1794

, which corresponds to chemical

formula 1 when A₁ and A₂ are both methyl substituted phenylene groups as per present claim 1 (see Example 6). Example 5 of the reference discloses that the oligoarylene is present in the amount of 40:2 to the diaminopyrene material.

Allowable Subject Matter

8. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Applicant claims the recited blue organic electroluminescent device wherein the luminescent layer comprises as a dopant the chemical formula 1 with A₁ and A₂ being represented by one of the chemical formulas in present claims 9. The closest prior art, Ikeda et al., U.S. Patent Number 7,429,425, teaches an organic electroluminescent device comprising an organic layer comprising a mixture of a diaminopyrene and a substituted polycyclic condensed structure. Ikeda does not teach or suggest the substituents required by present claim 9.

Response to Arguments

9. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
